

Wall Repair Kit

Ideal for repairing holes in plastered walls and plasterboard for a smooth finish.

Kit includes:

All purpose filler
(2 x 500g)

Wall repair patch
(150mm x 150mm)

Sanding block

Mixing tool

Filling knife

Mixing bucket

Instruction leaflet

4

1 Surface preparation

Ensure the damaged area is sound, dry and free of loose material.

2 Mixing

Add 500g of filler to 325ml of clean water. Stir continuously to a smooth paste.

Leave to stand for 5 minutes, allowing any undissolved powder to be absorbed. Then re-stir to a creamy consistency.

3 Application

For holes in plaster and plasterboard: remove the paper backing from the self-adhesive patch and apply over the hole with firm pressure.

Apply plenty of filler over the patch, pushing it through the holes. Then, working from the centre, feather out at least 50mm beyond the patch edge. Allow to dry for at least 1 hour. Apply additional coats if required, feathering at least 50mm beyond the edges of the previous coat.

For general filling: fill holes and cracks with the filling knife. Clean tools and bucket using warm soapy water immediately after use.

4 Decoration

Ensure the area is fully dry before lightly sanding to remove imperfections. To match the existing surface colour, paint when dry with a good quality emulsion. Always follow the paint manufacturers' instructions for porous surfaces.

Drying time

The mixture is usable for approx. 45 minutes. Setting time is 60-70 minutes, depending on atmospheric conditions.

Coverage

This kit will sufficiently fill 4m² (at 2-3mm depth) and repair one double-socket sized hole.

Storage

Store in a clean, dry place off the ground, as absorption of moisture can affect the performance of the product. Do not use the filler after the 'Use by' date printed on the packaging.

HEALTH AND SAFETY INFORMATION

Keep out of reach of children.

IF ON SKIN: wash with plenty of water.

IF IN EYES: rinse immediately with plenty of water. Remove contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.

Avoid ingestion. Can cause discomfort if swallowed including stomach pain and vomiting. If swallowed, wash mouth with water and seek medical attention.

Dust may irritate eyes, sensitive skin and respiratory system. Always work in a well-ventilated area and wear a face mask if dry sanding.
