

# Texture Repair Kit

Ideal for repairing damage to existing textured walls and ceilings.

## Kit includes:

Texture  
(1.5kg)

Texturing  
brush

Mixing  
tool

Mixing  
bucket

Instruction  
leaflet

## HEALTH AND SAFETY INFORMATION

Keep out of reach of children.

**IF ON SKIN:** wash with plenty of water.

**IF IN EYES:** rinse immediately with plenty of water. Remove contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.

Avoid ingestion. If swallowed, wash mouth with water and seek medical attention.

Dust may irritate eyes, sensitive skin and respiratory system. Always work in a well-ventilated area and wear a face mask if dry sanding.

## 1 Surface preparation

Ensure the area is clean, dry and free from flaking/loose material, oil and grease.

For gloss surfaces: lightly sand to provide a key, then, using a damp sponge, remove the dust and allow to dry.

## 2 Mixing

Add 1.5kg of texture to 750ml of clean water.

Mix to a thick paste consistency. Allow to stand for 10 minutes before re-mixing to a smooth paste. This consistency makes it ideal for filling small cracks and repairing damage to joints.

For broken leather or swirl patterns, stir in an additional 100ml of water; for stipple patterns add up to 200ml.

## 3 Application

Apply a generous, even coat of texture and then use the texturing brush to create the appropriate pattern. Blend into the surrounding area to match the existing pattern.

Clean tools and bucket using warm soapy water immediately after use.

## 4 Decoration

To match the existing surface colour, make sure the texture has dried, then seal the area before painting with a good quality emulsion. Always follow the paint manufacturers' instructions for porous surfaces.

## Drying time

Allow to dry for a minimum of 24 hours ensuring that the room temperature remains above 5°C and is well-ventilated.

## Coverage

This kit will sufficiently repair 1.8-3m<sup>2</sup> depending on texture design and thickness.

## Storage

Store in a clean, dry place off the ground, as absorption of moisture can affect the performance of the product. Do not use the texture after the 'Use by' date printed on the packaging.
